## ABOUT ME

---

As a full-stack web developer, I feel comfortable working with a team as well as by myself. I want to build my career as a full-stack web developer. I am also addicted to learning and exploring new technologies, and updating myself.

## TECHNICAL SKILLS

---

**Comfortable:** JavaScript, React, Node JS, Express JS, Bootstrap, SASS, MongoDB, SQL

**Familiar:** TypeScript, React Native, C#, HTML5, CSS3, Material-UI, TailwindCSS, Firebase

**Tools:** GitHub, VS Code, Heroku, Netlify, Trello, Chrome DevTools, Postman

## PROJECTS

---

### Bangla Commerce - Full Stack - Team Project [LIVE LINK](#) | [GITHUB CLIENT](#) | [GITHUB SERVER](#)

**Technologies Used:** Node JS, Express JS, React, TypeScript, MongoDB, Bootstrap, API, Firebase

This is a multivendor E-Commcer website. Where sellers can add their products create a store and customers can purchase products.

- The seller can add new products, the admin approves the products and can make another admin.
- Placed orders will check the admin then confirm the order.
- Global product search, filter with category, Google login, product reviews and more features added.

### Best Watch Point - Full Stack [LIVE LINK](#) | [GITHUB CLIENT](#) | [GITHUB SERVER](#)

**Technologies Used:** React, Node JS, Express JS, MongoDB, Firebase, Bootstrap

- The client can place an order, add shipment details, remove the order and give a review
- Admin can change the role of others users and can confirm orders.
- Admin can manage all users, add, update and delete products from the admin panel.

### The Traveler - Full Stack [LIVE LINK](#) | [GITHUB CLIENT](#) | [GITHUB SERVER](#)

**Technologies Used:** Node JS, Express JS, React, MongoDB, Bootstrap, API, Firebase

- Clients can see travel spots, booking and can manage booked items in the user dashboard.
- Admin can manage all booking requests, add, update and delete all services from the dashboard.
- The client can log in using a Google account.
